LED Lighting Information

Features

LED Lighting is an extremely effective design tool which can be used to transform and enhance a space.

Stefano Orlati lighting offers both functional and decorative applications – with its key roles being task & mood lighting.

There are so many clever ways to incorporate LED Lighting into an interior scheme. In the kitchen, the addition of under-cabinet lighting can enhance & open up a space. In the bathroom practical lighting can be incorporated such as ensuring the mirror is well lit or using a dimmer to control the brightness and mood of the space. Using strip lights or downlights in an open shelf or an entertainment unit is a great accent lighting option which can elevate & highlight the space.

LED Lighting is safe, environmentally friendly & contains no toxic mercury. It uses approx. 85% less energy than halogen or incandescent lights.

Benefits

- Energy efficient
- Low maintenance
- Plug & Play
- Contains no mercury or lead
- Emits no UV rays or infrared radiation
- Achieves full brightness in microseconds
- Operates at a much cooler temperature making it safer than incandescent lights
- Environmentally friendly – cuts greenhouse gas emissions and reduces landfill
- Lifetime of approx. 30,000 to 60,000 or more hours depending on the type of LED Light

Lighting Product Warranty

All Stefano Orlati lighting products offer you the warranties extended to you under consumer protection legislation. Our warranty is for one year from the date of purchase. The warranty is void if the lighting products are used with a transformer sourced from another supplier.

LED Lighting Information

Frequently Asked Questions

Why LEDs?

LED Lighting uses 85% less electricity than typical incandescent and fluorescent light sources. LEDs provide us with the most efficient way to save energy and conserve our natural resources. The light produced from an LED is an even spectrum and can last beyond 10 years (30,000 – 60,000 hours or more).

What does LED mean simply?

LED = light emitting diode, which are 'solid-state lighting' components. Each individual LED consists of a semiconductor diode that emits light when a voltage is applied to it.

Does turning LED lights on and off reduce lifetime?

No. Unlike incandescent and fluorescent lighting which will fail sooner when switched on or off more often, LED Lighting is unaffected by how often it is switched on or off.

Do LED lights produce UV and/or IR emissions or contain Mercury?

No. LED Lighting products typically produce virtually no light in the Ultraviolet (UV) or Infrared (IR) spectrums. LED bulbs do not contain mercury. They can even be recycled as they do not contain hazardous substances and are manufactured without hazardous substances.

Can LED lights be dimmed?

Yes, most of our range of LED lights can be dimmed – refer to the dimmer controller on page 30.

Do the LED diodes need to be replaced?

An LED diode does not "burn out" like a conventional lamp, so individual diodes do not need to be replaced.

Do LEDs overheat?

LEDs consume significantly less energy and operate at lower temperatures than typical incandescent bulbs. Most of the energy emitted from an incandescent bulb is converted into heat instead of light which is why you'll burn yourself if you try to touch it once it's turned on. In many cases you can actually feel the temperature difference just by being near the light. The beam of light source from an LED is cool, however waste heat is produced within the LED itself during the conversion of electricity into light.

The waste heat must be properly removed from the light to maximise fixture performance and to avoid damage to the LEDs. This is why all LED Strip Light options are recommended to be used in conjunction with an LED Profile.

The LED Profiles are well-designed lighting fixtures which act as heat sinks to draw heat away from the LEDs and dissipate it into the air surrounding the profile, thus prolonging the life of the LED diodes.

Is LED a different type of light?

Yes. LED light is said to be a safer, healthier light, because LEDs do not produce any form of ultraviolet radiation which causes colour fading in art & fabric, such as carpet fading etc. With LED Lights there is also no buzzing or flickering.

LED Lighting

LED Strip Lights

Products And Services

LED Strip Lights are a brilliant option for task and mood lighting and help to create ambiance and definition of a space. Common areas of application include kitchen & bathroom lighting, under-cabinetry lighting, shopfitting & or display lighting, signage, architectural lighting, and any other confined spaces requiring additional light.

Task Lighting

Decorative Lighting

Enhance the strip light by adding an LED Profile option.

What Are Your Options With LED Strip Lights?

MTM

Made to Measure (MTM)

Custom made lengths fabricated by us to your measurements. Each MTM strip light includes a soldered 2m tail or wire connectors for corners etc. (depending on requirements).

DIY

Do It Yourself (DIY)

Choose your required LED components. DIY strip lights are available in 5m rolls and include a tail soldered on each end.

Ordering

MTM

All MTM codes are specified on each product. When ordering MTM strip lighting, please order using the following code string, for example:

[SPECIFY MEASUREMENTS] **CODE: MTM-3528-CW**

DIY

All DIY codes are specified on each product. When ordering DIY strip lighting please order using the following code string for example:

[SPECIFY QUANTITY] **CODE: DIY-3528-CW**

Order Forms

As a helpful guide when ordering, request an LED Lighting order form or call us to discuss your requirements.

LED Lighting

LED Strip Lights

IP Rating

IP is a rating guide for the strip light for the level of protection from solids/water. Stefano Orlati Strip Lights are available in IP20 & IP65.
IP = Ingress Protection.

IP20 - No Coating

2 = Protected against solid objects over 12.5mm
0 = No protection from liquids/water

IP65 - Clear Water Resistant Coating

6 = Total protection against dust ingress
5 = Protection against low pressure water jets from all directions. Limited ingress protection

Diode Guide

The diodes on the LED Strip Light range in size and each will vary in brightness depending on a number of factors:

- The size of the diode
- The amount of diodes per meter
- The total watts per meter

3014 = 3.0mm x 1.4mm (diode size)

3528 = 3.5mm x 2.8mm (diode size)

5050 = 5.0mm x 5.0mm (diode size)

LED Lighting

LED Strip Lights

Options

- Plug & Play installation
- Cuttable in 50mm increments
- Self-adhesive peel and stick backing
- Best suited for an area hidden from view
- Choose any LED Profile option
- Recommended to be used in conjunction with an LED profile which assists with heat dissipation & ensures longevity of the LED diodes

LED Lighting

LED Profiles

Products and Services

LED Profiles transform the LED Strip Light into a complete lighting fixture which gives a stylish and finished look. They assist with heat dissipation of the strip light and ensure longevity of the LED diodes. The profile is composed of an aluminium backing and perspex diffuser which preserves and protects the strip light. Clear diffuser options provide maximum illumination and opaque diffusers diffuse light for a softer glow.

What Are Your Options With LED Profiles?

MTM

Made to Measure (MTM)

All Made to Measure orders are fabricated by us to your measurements. The profile includes diffuser, end caps, mounting clips (if applicable) & LED Strip Light option. For any in-depth lighting orders it is recommended to supply a sketch or plan.

DIY

Do It Yourself (DIY)

Choose your required LED components. All DIY components are supplied separately.

Ordering

MTM

When ordering Made to Measure lighting, please order using the following code string, for example:

Made to Measure **MTM** | Profile & Diffuser Option **SLIM-OP** | Strip Light Option / Colour **3528-CW**
CODE: MTM-SLIM-OP-3528-CW

Use the table below as a reference guide for strip lights colours and options.

STRIP LIGHT OPTIONS / COLOURS

Strip Light Option/Colour	Code	Strip Light Option/Colour	Code
3528 Daylight White	3528-DW	5050 Daylight White	5050-DW
3528 Cool White	3528-CW	5050 Cool White	5050-CW
3528 Warm White	3528-WW	5050 Warm White	5050-WW
3528 Amber	3528-AMBER	3014 Daylight White	3014-DW
3528 Blue	3528-BLUE	3014 Cool White	3014-CW
3528 Green	3528-GREEN	3014 Warm White	3014-WW
3528 Red	3528-RED	5050 RGBW Multi Colour	5050-RGBW

DIY

All DIY codes are specified on each product. When ordering DIY LED Profiles please order using the following code string, for example:

[SPECIFY QUANTITY] **CODE: DIY-SLIM-OP**

*For further information on LED strip light options refer to pages 10.7-10.14.

PIR Sensor	SS-PIR-SINGLE	Single Sensor
	SS-PIR-DOUBLE	Double Sensor

Detection Area	Approx. detection 1m
Input	DC 12V or DC 24V constant voltage
Output	DC 12V or DC 24V
Loading Power	24W or 48W
Mounting	Surface or recess
Recess Depth	11mm
Recess Diameter	16mm

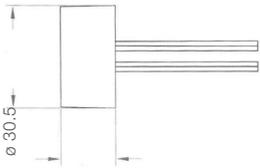

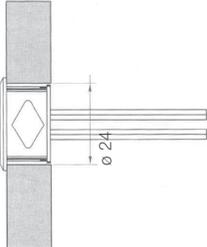

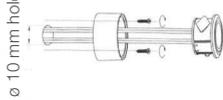

* For sensor switch capacity guide see page → 10.27

LED Lighting

LED Sensors

- Plug & Play installation
- On/Off switch function
- Activated by touch
- Compatible with Imperia downlight and 3528 & 3014 strip light options
- Silver colour

LED Lighting

LED Sensors

- Colour - White
- Plug & Play installation
- On/Off switch function
- Dimmer control includes – controller, remote/batteries & mounting bracket for remote
- Compatible with Imperia downlight, 3528, 3014 & 5050 strip light options

Technical and mounting details	Item number	Description
<p>Dimmer Controller</p> 	<p>LED-DIM</p> <p>Includes: remote, batteries, wall mount bracket</p> <p>RF Touch Remote 2.4 GHz</p> <p>Receiving Range 30 meters</p> <p>Input DC 12V or DC 24V constant voltage</p> <p>Output DC 12V or DC 24V</p> <p>Loading Power 60W (12V) or 120W (24V)</p> <p>Dimensions of Control Box 85mm x 45mm x 22mm</p> <p>Dimensions of Remote 114mm x 56mm x 20mm</p> <p><i>* For sensor dimmer control guide see page → 10.27</i></p>	<p>Dimmer Controller</p>

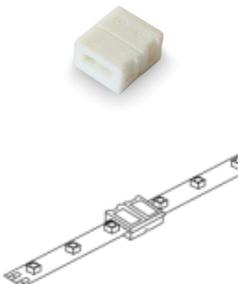

Sensor Capacity Guide

Hand Sensor / Door Sensor / PIR Sensor / Touch Dimmer	
Product	Capacity (maximum run)
12V - Imperia Downlights	4 x downlights (including 2m tail leading to transformer)
12V - 3528 Standard Strip Light	4.0 metres (including 2m tail leading to transformer)
12V - 5050 Extra Bright Strip Light	1.5 meters (including 2m tail leading to transformer)
24V - 3014 Continuous Strip Light	2.0 meters (including 2m tail leading to transformer)
Dimmer Control	
Product	Capacity (maximum run)
12V - Imperia Downlights	6 x downlights (including 2m tail leading to transformer)
12V - 3528 Standard Strip Light	10 metres (including 2m tail leading to transformer)
12V - 5050 Extra Bright Strip Light	4.0 meters (including 2m tail leading to transformer)
24V - 3014 Continuous Strip Light	5.0 meters (including 2m tail leading to transformer)

LED Lighting

LED DIY and Accessories

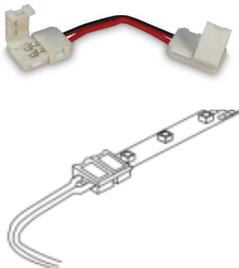

- Compatible with 3528 standard strip light only
- Connector dimensions - (L) 16mm x (W) 12mm
- DIY components are recommended for strip light only options (no profile)

	Item number	Length (m)
<p>DIY Connector</p> 	<p>DIY-CONNECT</p> <p>Note: Connectors are not recommended for use with LED profiles</p>	<p>N/A</p>
<p>DIY Tail</p> 	<p>DIY-TAIL</p> <p>Note: Connectors are not recommended for use with LED profiles</p>	<p>2</p>

LED Lighting

LED DIY and Accessories

- Compatible with 3528 standard strip light only
- Connector dimensions – (L) 16mm x (W) 12mm
- DIY components are recommended for strip light only options (no profile)

	Item number	Length (m)
<p>DIY Corner Connector</p> 	<p>DIY-CORNER</p> <ul style="list-style-type: none"> · 40mm wire between connectors <p>Note: Connectors are not recommended for use with LED profiles</p>	
<p>Extension Cable</p> 	<p>DIY-EXT</p>	<p>2</p> <p><i>2m extension lead can be used with LED Downlights and LED strip lights (except RGBW-strip lights)</i></p>

LED Lighting

LED Transformers

- Protections - short circuit / overload / over voltage / over temperature
- Option of 25W or 60W depending on application requirements – see LED compatibility
- All transformers are supplied with a 6-way junction box

	Item number	Description
	TF-25-12	12V-24W Transformer AC Input Voltage 100-240VAC - 50/60Hz , 1.0A Max DC Output 12V DC 2.08A Constant Voltage Output Watts Max 25 Watts Dimensions (L) 100mm (W) 47mm (H) 27mm Power Input Cord 1.5m LED Compatibility Imperia downlight, 3528 standard strip light, sensor switches

Transformer Capacity Guide

12V-25W Transformer

LED Downlights/Strip Lights

Imperia Downlight
 3528 Standard Strip Light
 5050 Extra Bright

Per 25W Transformer (no sensors attached)

6 x downlights (including 2m tail leading to transformer)
 5.0 meters (including 2m tail leading to transformer)
 1.5 meters (including 2m tail leading to transformer)

Refer to sensor and controller capacity guide, *see page* → 10.27

LED Lighting

LED Transformers

- Protections - short circuit / overload / over voltage / over temperature
- Option of 25W or 60W depending on application requirements – see LED compatibility
- All transformers are supplied with a 6-way junction box

	Item number	Description
	TF-60-12	12V-60W Transformer AC Input Voltage 100-240VAC - 50/60Hz 1.5A Max DC Output 12VDC 5.0A Constant Voltage Output Watts Max 60 Watts Dimensions (L) 117mm (W) 51mm (H) 35mm Power Input Cord 1.5m LED Compatibility 3528 Standard, 5050 Extra Bright

Transformer Capacity Guide

12V-60W Transformer

LED Strip Lights

- 3528 Standard Strip Light
- 5050 Extra Bright Strip Light

Per 60W Transformer (no sensors attached)

- 10 meters (including 2m tail leading to transformer)
- 4.0 meters (including 2m tail leading to transformer)

Refer to sensor and controller capacity guide, *see page* → 10.27

LED Lighting

LED Transformers

- Protections - short circuit / overload / over voltage / over temperature
- Option of 60W or 90W depending on application requirements – see LED compatibility
- All transformers are supplied with a 6-way junction box

	Item number	Description
<p>24V-60W Transformer</p> 	TF-60-24	<p>24V-60W Transformer</p> <p>AC Input Voltage 110-240VAC, 50/60Hz, 1.4A</p> <p>DC Output 24V DC 2.50A Constant Voltage</p> <p>Output Watts Max 60 Watts</p> <p>Dimensions (L) 125mm (W) 50mm (H) 31.5mm</p> <p>Power Input Cord 1.5m</p> <p>LED Compatibility 3014 continuous & 5050 RGBW multicolour strip light options</p>

Transformer Capacity Guide

24V-60W Transformer

LED Strip Lights

3014 Continuous Strip Light

5050 RGBW Multicolour Strip Light

Per 60W Transformer (no sensors attached)

3.5 meters (including 2m tail leading to transformer)

4.0 meters (including 2m tail leading to transformer)

Refer to sensor and controller capacity guide, *see page* → 10.27

LED Lighting

LED Transformers

- Protections - short circuit / overload / over voltage / over temperature
- Option of 60W or 90W depending on application requirements – see LED compatibility
- All transformers are supplied with a 6-way junction box

	Item number	Description
	TF-90-24	24V-90W Transformer AC Input Voltage 110-240VAC, 50/60Hz, 1.4A DC Output 24V DC 3.75A Constant Voltage Output Watts Max 90 Watts Dimensions (L) 150mm (W) 60mm (H) 33mm Power Input Cord 1.5m LED Compatibility 3014 continuous & 5050 RGBW multicolour strip light options

Transformer Capacity Guide

24V-90W Transformer

LED Strip Lights

3014 Continuous Strip Light

5050 RGBW Multicolour Strip Light

Per 90W Transformer (no sensors attached)

5.0 meters (including 2m tail leading to transformer)

5.0 meters (including 2m tail leading to transformer)

Refer to sensor and controller capacity guide, *see page* → 10.27
